PROFESSIONAL SUMMARY

Third-year B.E. Computer Science and Engineering student seeking Full Stack Developer internship and entry-level roles. Built full-stack and backend projects with React, TypeScript, Node.js, Express.js, FastAPI and Flutter, covering storage tooling, server monitoring and AI-assisted architecture generation. Ranked #1819 of 4,094 in HackerRank Orchestrate (October 2026).

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL
Frontend: React, Flutter
Backend and APIs: Node.js, Express.js, FastAPI, Streamlit, Socket.IO
Databases: MongoDB, SQLite
Cloud, DevOps and Tools: Docker, Linux, Git, GitHub
Testing: Pytest, Vitest, Playwright

PROJECTS

SpaceSentry - Safe Storage Intelligence for Windows | Python, FastAPI, React, TypeScript | github.com/andhony07/SpaceSentry

- Developed individually and submitted to Next Byte Hacks V5; scans selected directories, detects duplicate files, categorizes storage use and estimates recoverable space.
- Implemented safe cleanup with previews, quarantine, restore and audit history, requiring user approval before any cleanup.
- Verified with 108 backend tests and 16 frontend tests; TypeScript compilation and production build succeed.

SentinelAI - AI-Based Server Health Monitoring | Python, FastAPI, Streamlit, SQLite, scikit-learn | github.com/andhony07/AI-Based-Server-Health-Monitoring

- Built a monitoring system that analyzes server CPU, memory, disk and network metrics and detects anomalies with an Isolation Forest model.
- Added health scoring, risk classification and explainable diagnostics with investigation recommendations.
- Generated AI-assisted incident explanations with a deterministic fallback.

DevWatch - Cloud DevOps Monitoring Platform | Node.js, Express.js, Flutter, MongoDB, Socket.IO | github.com/andhony07/DevWatch-Monitoring

- Developed a multi-tenant platform for cloud and infrastructure monitoring, including server-agent telemetry.
- Implemented website and API monitoring with alerting and incident management.

AI-Powered System Architecture Generator | React, Node.js, Express.js, MongoDB, Gemini API | github.com/andhony07/Architecture-Generator

- Built a MERN web application that accepts software project requirements and generates architecture recommendations using the Gemini API.

EXPERIENCE

Python Programming Intern | CodeAlpha | Remote | 20 Jul 2026 - 20 Aug 2026

- Completed Python programming tasks assigned during the internship, applying core Python and problem-solving skills; work is in the codealpha_tasks repository.

Full Stack Development Intern | Brainary Spot Technologies | Coimbatore, India | May 2026 (one week)

- Completed a one-week introductory internship covering React.js and Node.js fundamentals and basic full-stack development workflows.

EDUCATION

B.E. Computer Science and Engineering (third year) | Sri Shakthi Institute of Engineering and Technology | August 2024 - July 2028 | CGPA: 8.00

ACHIEVEMENTS

- HackerRank Orchestrate (October 2026): Completed the Ghost Data Still Exists challenge; ranked #1819 of 4,094 participants.
- Next Byte Hacks V5: Submitted SpaceSentry as a hackathon project.

CERTIFICATIONS

- NPTEL - Programming in Java (Elite, 88%)
- AWS - Prompt Engineering Best Practices for Amazon Bedrock Models; Automating Cloud Security Posture Management on AWS
- Job simulations: Deloitte Technology, Deloitte Data Analytics, Tata GenAI-Powered Data Analytics (Forage); AI in Action (Vista)
